INTEREST

Computer Game
listening Music
Play Football

EXPERIENCE

I have just found your job post and I am really interested in your project. I am MEAN stack developer with 5 year experience in angularjs and node.js. Material design and angularjs are what I am strongest at. I am expertised in building REST api with nosql(mongo/Redis) + node (express / sail.js). Please take a look at my profile and my portfolio. And you can find some source code and my working style in my github repository - <https://github.com/ITSolution-git>. You can find ruby on rails project - byteapp. <https://app.mybyteapp.com>
